

THE  
**RUBBER**  
GROUP

Custom Rubber Molding,  
Engineered Products.

The Rubber Group is the leader in custom molded rubber products. We are based in Rochester, New Hampshire (USA) and have global manufacturing capabilities. We use injection, compression, and transfer molding to produce engineered products to provide you with the most cost-effective solutions.

*The Rubber Group combines over 60 years of experience, creativity, and innovation to provide the best overall performance and value.*

## PRODUCT REALIZATION

The Rubber Group is more than a rubber molding company. We're the product realization partner that you need. From design to prototyping to manufacturing to packaging, we can help turn your ideas into reality. Whether you're a startup or a Fortune 500 company, we can create the engineered products that meet all of your business and technical requirements.

### Value-Added Manufacturing

When you partner with us, you can refine your part design and enhance product performance with:

- Rapid prototyping
- Quick Turn Single Cavity Tooling
- 3D scanning
- Fourier-transform infrared spectroscopy (FTIR)

## TURN IDEAS INTO REALITY

### Design Assistance

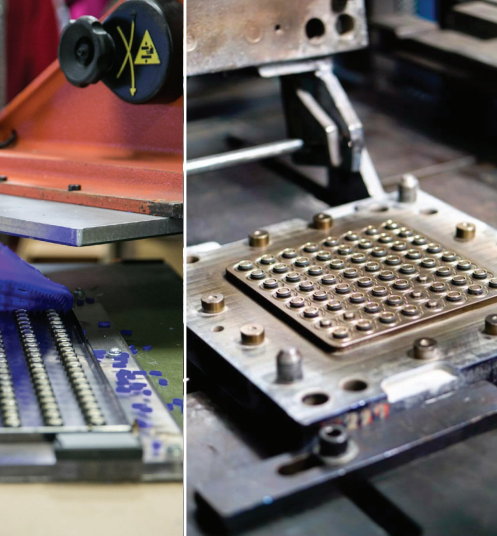

- Drawing development
- Design review

### Material Selection

- Solid, sponge, and foam rubber
- Felt, fabric, and adhesives
- Mylar, plastics, and more

### Process Selection

- Analyze tooling costs, cycle times, and run quantities
- Choose compression, injection, or transfer molding
- Over molding on metals, plastic and fabric

## MARKETS

These are some of the markets that we serve.

Oil and Gas

Aerospace and

Defense

Passenger Rail

Medical Device

Food and Beverage

Packaging and

Dispensing

Automotive

Heavy Equipment

Mining

Energy

Electronics

## PRODUCTS & SERVICES

### Custom Rubber Molding

We've developed our own compounds and meet tight tolerances and demanding specifications. The rubber we mold includes:

- Silicones
- Fluorinated silicones
- Viton
- Fluorocarbons
- Nitrile (Buna-N)
- Neoprene
- EPDM
- Natural rubber
- Aflas (TFE/P)
- Vamac (EA)
- Urethane (PU)
- Styrene Butadiene (SBR)
- Fluorosilicone (FVMQ)
- HNB

### Custom Products

We use the right molding and fabrication methods to create the custom products that you need.

- Plastic injection molding
- Die cutting, water jet, laser
- Extruded profiles and spliced extrusions
- Plastic injection molding
- Lathe cut washers
- Molded reinforced hose
- Cast urethane
- Sheet goods
- Rubber coated fabrics
- Rollers and drive wheels

### Standard Products

We mold and maintain a large inventory of standard rubber products like these:

- Rubber grommets
- Isolation mounts
- Rubber bumpers
- Appliance feet
- Rubber O-rings

### Quality Control and Customer Service

The Rubber Group is ISO 9001:2015 certified and an ITAR registered manufacturer. We meet rigorous quality standards and put our best into everything we do.

*Your satisfaction is important to us. That's why our commitment to customer service includes on-time deliveries and global distribution.*
